

Hardware fitting 10-point locking personnel doors

Hardware fitting areas

= OK

= Not advisable

If you wish to fit hardware to the door within the 130mm area shown on the diagram, please contact us for advice. This area of the door is where the locking mechanism is located and fixings may interfere with the workings of the door.

Please note – When fitting ERD strips supplied by Kirncroft; do not use a screw with more than a maximum length of 13mm.
